Sept. 9, 1936.

Miss Charlotte Michaud  
Lewiston Evening Journal  
Lewiston, Maine

Dear Miss Michaud:

This comes rather late as an acknowledgement of the Journal which I received some time ago. I hope you will again realize how much our program keeps the hours filled up.

It was thoughtful of you to send it. You have my sincere thanks.

I also want to thank you for sending your feature on the four Harbors of the island and Asticou Terraces.

I read both the features with keen interest and liked them very much.

You may be interested to know that at least three new records were made this summer for contacts on different events of our nature-guide program. The record for any scheduled hike or nature-walk was made on the tenth of last month when 50 people of all ages went on the Huguenot Head nature-walk, lasting around three hours. This is far excess of any nature walk since the nature-guide program has been offered (1933). The sea cruise in Frenchman's Bay takes the prize though. Our record for this is 88 contacts made on August 25. This event has been one of our most popular, averaging 64 during August. Then the record for the Island Historical Museum is 74, made on August 20th, which required four boatloads.

Sincerely yours,

Paul G. Favour, Jr.  
Ranger Naturalist
